Windows File System:	Microsoft Word, PowerPoint
Backend Programming Languages:	C++, Java, Python, Node.js, MVC
Frontend Programming Languages:	HTML, CSS, JavaScript, UI/UX
Database:	MySQL, MongoDB, Amazon DynamoDB
Latest Technologies:	React, Express, Passport, Handlebars, GraphQL, AI

EDUCATION & CERTIFICATIONS

Southern New Hampshire University	Graduated
-----------------------------------	-----------

BS-Computer Science, concentration Software Engineering

- Cumulative GPA: 3.9
- Coursework: Software Test, Automation & QA, Client/Server Development, Software Reverse Engineering, Emerging Sys Arch & Tech

University of New Hampshire Coding Bootcamp	Graduated
---	-----------

Certificate-Full Stack Software Development

- Completed Grade: A+
- Coursework: Full Stack Development, Agile Methodology, React, GitHub
- **Google IT professional certificate**

ACADEMIC PROJECTS

- [Car Enthusiast Quiz](#) - A program created as a car quiz with responsive design ques in mind. Time is deducted for wrong answers and high scores are saved and can be cleared. HTML, CSS, JavaScript and Local storage were used for this assignment. This project showcases a mission-driven skill to create an application that utilizes JavaScript and CSS to dynamically show and hide features.
- [React Portfolio](#) – Project to turn a portfolio that was using MVC into a portfolio using a single page application by use of react. This project utilizes Heroku to host the page.
- [Find Me Food Application \(Group Project\)](#) - Pulls the user's location immediately from their IP address and feeds it into Google Maps to populate a list of nearby restaurants. This application showcases a collaboration with other programmers committed to creating a responsive web application. My part of the project was to list out the restaurants where my used problem-solving skills to find an innovative way to create unordered lists based on the number of restaurants found. This code involved close attention to detail to dynamically create each list as well as list items which in turn helps for scalability.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern, Geaux Network, Boston, MA

05/2023 –

Present

Develop new user-facing features and translate designs into high quality code as well as create backend functions.

- Increased analytical skills by analyzing and documenting problems, recommending solutions, and initiating corrective actions.
